

SOCCER FIELD

So, there are tons of places in New York City that I would say are my favorite, but if I have to choose one out of them all, I would go with Pier 40. The reason why I would say Pier 40 is because it's a place full of soccer fields. It's a place where I would sometimes go with a couple of my friends or even family members just to play a quick pickup game. Also, it's one of my favorite places because it's a place that would help me forget about everything going on, such as school work or even personal problems. In other words, it's a place where I would have fun, joke around and do something I like to do which is to play soccer.

Trade Center. So, Pier 40 has two levels where a couple of fields are on the bottom which could be interpreted as the first floor, and then there is one field on top which is second floor. Furthermore, you're able to see and hear many things going on while you're playing; for example, you can see the ocean, you can hear cars honking, people shouting, whistles being blown. I recommend people to go in the night because you see the nice bright lights from the buildings in Manhattan, and you can also see the big bright lights that are in the fields, which in some way can make you feel like you're in an actual stadium.

Pier 40 is on Hudson so you're able to see Manhattan's beautiful buildings. Especially the One World
