

Steve Ortiz

Culmination Proposal

OVERVIEW

In the midst of this pandemic and with the changes going on in the world my culmination also had to change. Instead of programming the show live I will be submitting all the paperwork that would have been done. Here is a list of deliverables I plan to present:

- Vectorworks plot of what the show would have looked like
- Drawings/renderings of show
- Research ideas
- Color palettes
- Cue list
- Lighting inventory
- Circuit Locations

OBJECTIVE

The main thing that I hope to gain by the end of this project is to further my knowledge on the technical aspects that go into creating a lighting design as well as the adaptability of having to move everything into a purely paperwork project. The main goal of this design is to create something that i am proud of as well as create something that could potentially be used in the future as an example or as an actual plot.

FUTURE PROBLEMS

One thing that could be an issue or already presented itself as an issue is downloading software onto my pc. Another issue would definitely be time management and balancing this project with other projects.
