

Designer Cookbook: Comic book Artist
By Eduardo Mendez

What I'm inspired by the artist designer of my work, Ian Mcginty. He was an American comic book writer and artist. He was born in Annapolis, Maryland on May 6, 1985, and studied art at ST. College of Southern Maryland, as well as the Savannah College of Art and Design. He has improved art and writing for comics based on popular cartoons. He is also an animator, he created called, "Welcome to Showside", he creates a shorts film. He's the best comic artist and motion graphic designer, and his drawing was amazing and interesting, and people are enjoying it.

Therefore, I'm inspired by Ian Mcginty a famous comic artist, because I have a skill of drawing and illustrating to create a comic and editing the animation. However he died on June 8, 2023, at age 38. I'm really sad that he passed away, but I will never forget that his cartoonist drawings are amazing. Now and then cartoonists help each person completely and still so much growing up within the comics community that is needed before the next big step forward. In order to focus on the comics art industry.

Ian McGinty's Comic arts
