

**The library
is everywhere**

Use the Library Tools widget
in OpenLab, and the Guide
to Research in Blackboard..

Using Blackboard?

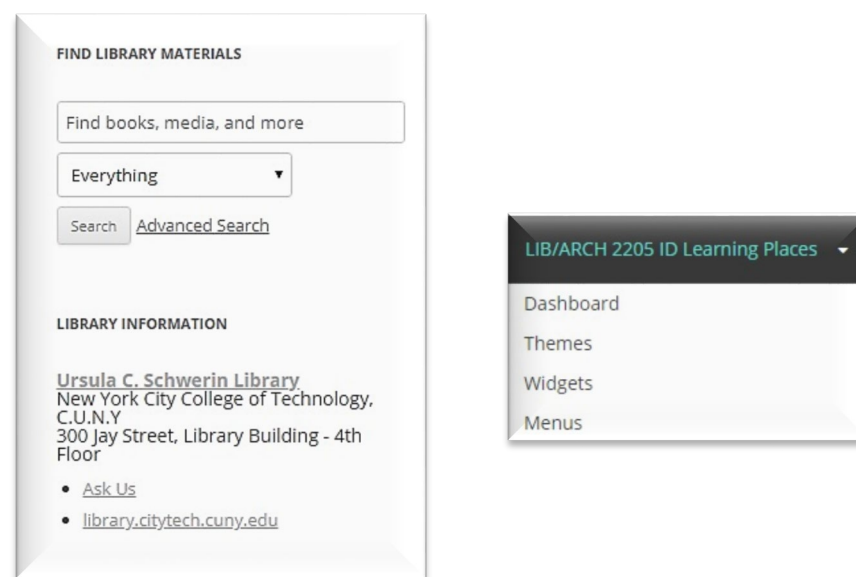

Use the **City Tech Library** on your course menu link to access a research guide that covers research basics and includes citation resources, multi-disciplinary databases, and more.

Add the subject specific library research guide for your course using the **Add Menu Item** feature in Blackboard and selecting **Web Link** to allow your students to access discipline specific resources with one click.

Using OpenLab?

The **Library Tools** widget is added to new OpenLab courses by default. This widget allows students to search for library sources from within your course and has a direct link to our main website and 24X7 “Ask a Librarian” chat service.

Cloned a course from a previous semester and don't see the widget? Add it using the widget feature in your OpenLab dashboard. Just drag it into the **Main Sidebar**!
