Executive Summary for Culmination proposal

Summary-

My culmination project will be a short film about what it is to be a musician. I'm going to be working on it on my own and with the musicians.

Background-

I decided to do a short film about what it is to be a musician because I am a musician. Being a musician has had a great influence in my life and many others and being able to play with a group has made the experience better. But as we continue to grow up sometimes having the time to put in the work to learn and actually play has decreased. I love editing and capturing the moment, as well I will relate to what I want to portray. So that's why I decided to work and make something worth watching.

Process-

The group is composed of myself and my group of musicians. I am going to do the plan, take videos, do voice overs and edit them all together. I will be using Avid Composer as my editing software and some Adobe premier.

Results -

I expect to go over how music has influenced myself and peoples lives as well as raise awareness of what is the struggle in the day of a musician. Along with that I expect to improve my skills taking videos and editing them. As well as improving my audio mixing.

Recommendations -

This will hopefully help me individually to keep practicing and improving with music. I am going to need good plans and need to put it well together. It will open up my mind to better thinking and better teamwork.

Project Description

The short film will be about a day of a musician, it will be about 5-7 minutes long. It will bring awareness about what it is to be a musician and what it is to be good at it.

Current Skills: My paths are Video and Sound. Worked with cameras, Avid media composer, Adobe premier.

Skills I want to learn:

Tiffany- Videographer, will be in charge of the camera and setting it up for all the footage.

Director, will be in charge of making sure we have all the footage.

Editor, will edit and have the footage together.

Audio- make sure everything is well mixed.
