

# How To Create Your Very Own Moisturizing Lip gloss

---

September 21, 2020

Makeup and beauty

Hey Lovelies, as you all may or may not know, Shae's Suga Collection is all things beauty and sells 100% vegan and cruelty free cosmetic products. I am here to talk about the products I use and how I use them to create the perfect moisture and shine for our beautiful lips.

Versa gel | lip gloss base

In order to achieve the perfect gloss, you must start off with the perfect foundation. Versa gel is a sticky base for lip glosses and a variety of other cosmetic products and provides great skin benefits. Versa gel products are odorless and do not discolor with time. They are easier and safer to formulate with than gels that use metal stearates or fumed silica.

## Essential oils | oils

Benefits from using essential oils like avocado oil, coconut oil and grapeseed oil

1. allow the gloss to apply smooth to the lips
2. Provides moisture to chapped lips
3. Protects skin from damaging UV rays
4. High in vitamins

## Pigments | color | scents

To make your lip gloss have that wow factor, after you've done mixing in the essential oils to the versa gel you can add in pigments and scents of your choice. Nobody wants a boring lip gloss and there is so many options you can choose from so make it fun.

### Lipgloss | Cosmetics

And there you have it lovelies, the perfect moisturizing and fun gloss. It's as simple as it gets. Apply your base and essentials oils. Then mix to your desired consistency. Next add in your pigments and flavorings and have fun with it. Lastly insert your mixture into lip gloss tubes.
