

Tyshae Greene

Print Lab

Professor Munroe

5/9/22

1. I used a block, a cotton t shirt, paint brushes, and blue/yellow paint for this project.
2. I used straight repeat pattern and half drop repeat pattern. It was quite easy to do both patterns because they are very similar.
3. I got a clean print every time because I used enough paint on the block, spread it out evenly, then applied the block to the t shirt while the paint was still wet.
4. While working on the project, I discovered that printing by hand is a highly untidy and time-consuming process.
