

### Project Description

I have acquired knowledge in video editing and working with video cameras during my time at City Tech. I am eager to put my video production and editing abilities to the test by creating a short 5-10-minute documentary that explores Central Park, one of NYC's most iconic parks. This documentary will delve into a little bit of the history of Central Park, as well as the different sculptures and landmarks that make Central Park beloved. I plan to utilize a combination of historical photographs, on-location shots, and narrative voiceovers. Towards the end, I plan to include interviews with individuals sharing their thoughts on Central Park. The theme will be 'Iconic Features of Central Park.'
