Game Pitch Explaining

“The Three Door” is The first adventure funny text casual game independently developed by IDEA Studio. IDEA Studio was founded and created by Michelle Wu Feng & Yinghe Zhao. The game was inspired by the modern climate and environmental pollution and the Chinese variety show “Who is the Murder.” That is a text game that focuses on climate changes and excessive energy consumption. The player takes on the role of a player who has stumbled into the game, with three characters to choose from: “Detective, Doctor, and Financial tycoon,” and a hidden character to discover. To players can use a relaxed state of mind to finish this game, the creator added a lot of interesting secret language and questions. These are all things the player needs to discover.

The background of the game is the relationship between Blue and Yellow. The player’s planet is Blue. As a cold wave sweeps across Blue, the planet faces a double crisis of energy and oxygen shortages, leaving many places too hard to support human life. The cold wave is that people overexploit Blue’s natural resources and destroy the environment. Blue Planet has a channel to exchange information with Yellow. The channel provides Blue planets with a constant “zero-cost, zero-pollution energy and oxygen” stream. The material from Yellow was toxic, making Blue’s environment worse than before and mutating most of Blue’s creatures exposed to radioactive contamination. Therefore, people need to buy oxygen tanks to keep breathing and protect themselves from contamination and mutation. Their goal is to capture Blue’s territory and save Blue. Players need to be brave enough to make a choice. Depending on the player’s will, the

game offers multiple endings -- "Die" or "Complete the mission." The game is not very perfect. That is only an internal test version of the game. The developer needs players' feedback. We welcome players to give us comments to make this game more perfect. Play it now if you want to find something interesting in your game.

P.S: Readers who can read this will be given a cheating word throughout the game
