

NEW YORK CITY COLLEGE OF TECHNOLOGY/CUNY  
DEPARTMENT OF COMPUTER SYSTEMS TECHNOLOGY

**CST1101–PROBLEM SOLVING WITH COMPUTER PROGRAMMING**  
**(4 hours – 3 credits)**  
**FALL 2021**

**Instructor:**

|                 |  |
|-----------------|--|
| Name            | Prof. Tamrah D. Cunningham   |
| Office Location | Online for the Spring 2022   |
| E-mail          | <a href="mailto:TCunningham@citytech.cuny.edu">TCunningham@citytech.cuny.edu</a>   |
| Office Hours    | Fridays from Noon - 2:30 pm. First, email for an appointment, and then a Zoom link will be provided along with confirmation. I will respond to emails within 24 hours of receiving them. |

**Meeting Days:**

|           |                     |                                |
|-----------|---------------------|--------------------------------|
| Monday    | 10:00 am – 11:40 am | Namm-1102                      |
| Wednesday | 10:00 am – 11:40 am | Blackboard Collaboration Ultra |

**Course Description:**

This course introduces students to concepts of problem-solving using constructs of logic inherent in computer programming languages. Students study the nature of problems, common solution approaches and analysis techniques. Students use a flowchart interpreter to diagram problem solutions. Students learn the basics of computer programming by learning Python. Both Python scripts and flowcharts enable students to construct solutions to common algorithmic problems. The major emphasis is on teaching the student to identify solutions to a problem and translate them into various forms that will enable the computer to perform some of the steps in a solution of an actual problem instance. These forms include flowcharting tool, viewing generated software code and the basics of debugging the code. At the end of the class students will write a project Python scripts that demonstrates the students' knowledge of all the basic programming concepts discussed in class (e.g., variables, conditions, loops, functions).

**Online Course:**

This course is online and will be taught synchronously on Blackboard. What that means is that for every meeting day, students will log on to Blackboard, access Blackboard Collaboration Ultra and join the session for that day. An announcement will be sent every time there will be class. If you are not able to be in front of a computer at that time, you can dial-in and use your phone. If you miss out on the online lecture for that day, a recording of the session will be made available later that day for you to view.

**Online Attendance and Participation:**

Your attendance will be taken at the end of online session. When you log in, Blackboard will track the time you enter the session and the time that you leave. Participation for the course is based on responding via the chat and/or voice.

*If you have any technical issues with Blackboard, check out this link below:*

<http://websupport1.citytech.cuny.edu/studentbb.html>

### **Course Objectives**

Upon successful completion of the course, students should be able to:

- Demonstrate understanding of the steps required to solve a problem using a computer;
- Demonstrate understanding of flowcharting techniques to solve an algorithm;
- Demonstrate the knowledge of Boolean algebra (AND, OR, NOT operations);
- Demonstrate understanding of the major programming notions: variables, decision statements, repetition/loop statements (both count- and event-controlled), arrays/lists, modules/functions, classes and objects and their use for basic problem solving;
- Demonstrate understanding of the two major programming paradigms: procedural and object-oriented;
- Install and run the IDLE Python programming environment;
- Design and implement basic Python scripts; and
- Demonstrate broad problem-solving experience by referring to solutions from a problem bank covered during class.

### **General Education Outcomes**

- **SKILLS/Inquiry/Analysis:** Students will employ scientific reasoning and logical thinking.
- **SKILLS/Communication:** Students will communicate in diverse settings using oral (both speaking and listening) and visual means.
- **VALUES, ETHICS, RELATIONSHIPS / Professional/Personal Development:** Students will have access to on-line materials and solutions to programming problems and will be required to process those materials and solutions, understand them, use the ideas from them without passing others' ideas as their own.

**Prerequisite** – CUNY certification in mathematics, reading and writing. General knowledge of a personal computer is needed. Students may enroll in a workshop at the Academic Learning Center, located in the Atrium.

This is an OER (Open Educational Resources) course. All the required reading materials are free. The OER page for the course can be viewed here:

<https://openlab.citytech.cuny.edu/cst1101-problemsolvingpython>

**Storage Media** – You must have a USB storage media.

### **Software Download (free, online)**

You will need a Windows or Mac computer/laptop with broadband internet access.

- Python official site that includes documentation, downloads (IDLE for Python 3.7), news:

<https://www.python.org>

- Flowchart interpreter  
<http://www.flowgorithm.org/>

### Recommended reading (free, online)

- Algorithmic Problem Solving with Python by John B. Schneider, Shira Lynn Broschat, and Jess Dahmen.

<http://www.eecs.wsu.edu/~schneidj/swan/index.php>

- How to Think Like a Computer Scientist by Peter Wentworth, Jeffrey Elkner, Allen B. Downey, and Chris Meyers  
<http://www.openbookproject.net/thinkcs/python/english3e/>
- Python Bibliotheca: <http://www.openbookproject.net/pybiblio/>

### Grading Distribution

|  |       |
|--|-------|
| Homework Assignments, in-class quizzes | 27%   |
| Test1                                  | 15%   |
| Test2                                  | 15%   |
| Project                                | 10%   |
| Uniform CST 1101 quiz                  | 3%    |
| Final Exam (cumulative)                | 30%   |
|  | <hr/> |
| Total                                  | 100%  |

### Grade System:

| Letter Grade    | A      | A-      | B+      | B       | B-      | C+      | C       | D       | F      |
|-----------------|--------|---------|---------|---------|---------|---------|---------|---------|--------|
| Numerical Grade | 93-100 | 90-92.9 | 87-89.9 | 83-86.9 | 80-82.9 | 77-79.9 | 70-76.9 | 60-69.9 | <=59.9 |

The grade distribution follows the information in the NYCCT Student Handbook (p.43).

NYCCT Student Handbook can be downloaded here: <http://www.citytech.cuny.edu/current-student/docs/StudentHandbook.pdf>.

### ONLINE ETIQUETTE AND ANTI-HARASSMENT POLICY

The University strictly prohibits the use of University online resources or facilities, including Blackboard, for the purpose of harassment of any individual or for the posting of any material that is scandalous, libelous, offensive or otherwise against the University's policies. Please see: ["Netiquette in an Online Academic Setting: A Guide for CUNY School of Professional Studies Students."](#)

**New York City College of Technology Policy on Academic Integrity:**

Students and all others who work with information, ideas, texts, images, music, inventions, and other intellectual property owe their audience and sources accuracy and honesty in using, crediting, and citing sources. As a community of intellectual and professional workers, the College recognizes its responsibility for providing instruction in information literacy and academic integrity, offering models of good practice, and responding vigilantly and appropriately to infractions of academic integrity. Accordingly, academic dishonesty is prohibited in The City University of New York (CUNY) and at New York City College of Technology (City Tech) and is punishable by penalties, including failing grades, suspension, and expulsion. The complete text of the College policy on Academic Integrity may be found in the catalog.

**Notice on Student Accessibility Services:**

"Qualified students with disabilities, under applicable federal, state and city laws, seeking reasonable accommodations or academic adjustments must contact the Center for Student Accessibility for information on City Tech's policies and procedures to obtain such services. Students with questions on eligibility or the need for temporary disability services should also contact the Center at: The Center for Student Accessibility, 300 Jay Street room L-237, 718 260 5143. <http://www.citytech.cuny.edu/accessibility> "

## Course Schedule

|                | Topic name   |
|----------------|--|
| 1<br>2<br>3    | <p><u>Topic 01</u></p> <p>Class logistics;</p> <p>Introduction:</p> <ul style="list-style-type: none"> <li>• What is problem solving?</li> <li>• Why Python?</li> <li>• Why Flowcharts?</li> </ul> <p>Computer problem solving:</p> <ul style="list-style-type: none"> <li>• Solution = program / algorithm</li> <li>• Well-defined set of steps</li> <li>• Examples of problems solved using sets of steps: cooking recipes, puzzles</li> </ul> <p>Computer problem solving<br/>Elementary program examples</p> |
| 4<br>5         | <p><u>Topic 02</u></p> <p>Idle introduction, installation tips, Python 3.7</p> <p>My first “Hello, World” program</p> <p>Code readability and comments,</p> <p>Introduction of two modes for Python IDLE (interactive and shell).</p> <p>Saving Python scripts and flowcharts. How saved scripts and flowcharts can be called and run/executed.</p> <p>Why interactive mode is not enough?</p>   |
| 6<br>7         | <p><u>Topic 03</u></p> <p>Variables, types, and data input/output</p> <p>The idea of a variable is introduced and the dynamics of the assignment statement are detailed. Three basic types are illustrated through examples: integers, floats, strings, Boolean.</p> <p>Type conversion</p>  |
| 8<br>9<br>10   | <p><u>Topic 04</u></p> <p>Boolean logic. Conditional execution (if-else)</p> <p>Boolean type is introduced together with three Boolean operations: and, or, not.</p> <p>Program structure and program flow. Demonstration of branching using flowcharts.</p> <p>Conditions/selections in Python:</p> <p>If<br/>If-else<br/>If-elif</p>   |
| 11<br>12<br>13 | <p><u>Topic 05</u></p> <p>Modules/functions</p> <p>Why creating modules within a program?</p> <p>Examples of modules (functions)</p> <p>Parameters / arguments</p>   |

|                |   |
|----------------|---|
|                | Passing parameters  |
| 14             | <u>Test1</u>  |
| 15<br>16       | <u>Topic 06</u><br>While loop<br>Condition controlled loop  |
| 18             | <u>Topic 07</u><br>Lists  |
| 18<br>19<br>20 | <u>Topic 08</u><br>For loop and lists<br>For vs While loop<br>For loop with Range: different settings.  |
| 21             | <u>Test 2</u>   |
| 22<br>23<br>24 | <u>Topic 09</u><br>String as a special case of a list<br>Strings and iteration<br>Importing modules   |
| 25             | <u>Topic 10</u><br>Introduction of the OOP paradigm.  |
| 26<br>27       | <u>Topic 11</u><br>Turtle graphics library. Turtles-objects.<br>Use Turtle Graphics to review the notion of an object and basic programming tools: condition and selection. |
| 28             | Additional topics based on the professor interest / leftover material / repetition of the topics that caused most problems and questions during the semester.               |
| 29             | Review for the final  |
| 30             | Final (cumulative)  |

### Assessment Criteria

| <b>For the successful completion of this course a student should be able to:</b>        | <b>Evaluation methods and criteria</b>  |
|---|---|
| 1. Demonstrate understanding of the steps required to solve a problem using a computer. | Students will describe problem, identify inputs, processes and desired outcomes in laboratory assignments, class work and tests.      |
| 2. Demonstrate understanding of flowcharting techniques to solve an algorithm.          | Students will solve problems using the flowchart interpreter software and Python 2.7 in laboratory assignments, class work and tests. |

|   |  |
|---|--|
| 3. Demonstrate the knowledge or Boolean algebra (AND, OR, NOT operations)   | Students will solve Boolean algebra problems in laboratory assignments, class work and tests and incorporate these solutions in flowcharts and Python scripts.                       |
| 4. Demonstrate understanding of the major programming notions: variables, decision statements, repetition/loop statements (both count- and event-controlled), arrays/lists, modules/functions, classes and objects and their use for basic problem solving. | Students will create algorithms for problem solving using the basic programming notions in laboratory assignments, class work and tests.   |
| 5. Demonstrate understanding of the two major programming paradigms: procedural and object-oriented.  | Students will create new classes and objects of these classes in laboratory assignments, class work and tests.   |
| 6. Install and run the IDLE Python programming environment.   | To complete homework assignments and practice programming skills outside the college students will install the IDLE Python environment on their own computers.                       |
| 7. Design and implement basic Python scripts.   | Students will use the knowledge of Boolean Algebra, problem solving paradigms and basic programming notions to write Python scripts in laboratory assignments, class work and tests. |
| 8. Demonstrate broad problem-solving experience by referring to solutions from a problem bank covered during class  | Students will demonstrate problem-solving ability in laboratory assignments, class work and tests.   |

### General Education Outcomes and Assessment

| Learning Outcomes  | Assessment Method  |
|--|--|
| <b>SKILLS/Inquiry/Analysis</b> Students will employ scientific reasoning and logical thinking. | Students will describe problem, identify inputs, processes and desired outcomes in laboratory assignments, class work and tests.<br><br>Students will solve problems using the flowchart interpreter software and Python in laboratory assignments, class work and tests.<br><br>Students will identify coding paradigms in Laboratory Assignments, Class work and tests |
| <b>SKILLS/Communication</b> Students will communicate in diverse settings using oral           | Students will discuss various problems and approaches towards solving these problems in class  |

|   |  |
|---|--|
| <p>(both speaking and listening) and visual means.</p>  |  |
| <p><b>VALUES, ETHICS, RELATIONSHIPS/ Professional/Personal Development</b><br/>Students will have access to on-line materials and solutions to programming problems and will be required to process those materials and solutions, understand them, use the ideas from them without passing others' ideas as their own.</p> | <p>Students will learn to respectfully use the code generated by other programmers giving.</p> |
