Food production

People cannot leave food, people eating food every day, but food is biggest problem in U.S, I know a lot of people like eating fresh food, because the fresh food like it making out just a few time, it is best time to eating them. Otherwise, having some people like frozen food, because the frozen food is too easy making people to use and the frozen food(meat) having a lot of people like, because we need eat something meat when some young people in the puberty. However, some people like shipping food, because some poultry live different place, and if you want to eat them, you should buying online then they will shipping to your address. In my mind, I think three food is equality. Because every food having two side, not all the one is good or bad.
