

## ProTattoo User Testing Status Report

### Completed User testing of App Interface

#### Issues/Suggestions/Improvements:

- Multiple Layers in Tattoo Design, Better Customization
- UI Display = More Colorful/Visually Friendly
- Choose what Part of The Body is Affected?
- Final Tattoo preview On Skin View
- Save Designs to Database
- Social Media Aspect / Share/ Copy Designs from other users
- Copyright in terms of URL images

#### To-Do:

#### **-Determine Final direction of Project (Wearable synthetic Skin? / Genetic / or Cybernetic Focus?)**

- *Improve UI Display(Add Color/Size Functionality)*
- *Remove URL aspect (avoids copyright)*
- *Browse Design will include more designs from hired artists*
- *Ability To Layer Multiple Designs*
- *Add Final preview image of design on body part*
- *Social Media Aspect = Share/Take Shared Designs from users*
- *Save Designs for future use*
- *PhotoShop-like design interface?*
