Mathematics 1375, Fall 2020
Instructor: Suman Ganguli

Quiz \#2
Due: Friday, October 2
$\qquad$

| Question: | 1 | 2 | 3 | Total |
| :--- | :---: | :---: | :---: | :---: |
| Points: | 10 | 4 | 6 | 20 |
| Score: |  |  |  |  |

Submit your written solutions by the end of the day Friday on Blackboard (look for the "Quiz \#2" Assignment). Please scan your written answers to a single pdf file.

1. (10 points) Shown below is the graph of the function $f(x)=-x^{2}+4$ :

(a) Compute the following values of $f$ (show your calculations), and label the corresponding points on the graph above:

- $f(0)=$
- $f(1)=$
- $f(-3)=$
(b) What is the domain of $f$ ? What is the range of $f$ ? Write the solutions in interval notation:
- domain of $f$ :
- range of $f$ :

2. (4 points) Find the domain of each of the following functions. Show the necessary calculations, and write the solutions in interval notation:
(a)

$$
g(x)=\frac{1}{x-2}
$$

(b)

$$
h(x)=\sqrt{x+1}
$$

3. (6 points) Let $f(x)=2 x^{2}-3 x+1$.
(a) Compute and simplify:

$$
f(x+h)=
$$

(b) Next, compute and simplify:

$$
f(x+h)-f(x)=
$$

(c) Finally, compute and simplify the difference quotient:

$$
\frac{f(x+h)-f(x)}{h}=
$$
