

How to Post Your Work on OpenLab

Be sure to have joined OpenLab and this class. Otherwise, you won't be able to post.

First, go to posts, then Add New. You'll have to choose the category, which will be under Student Work: Introductory Work.

The screenshot shows the WordPress admin interface for OpenLab. The main content area has a large heading "Add title" and a subtext "Start writing or type / to choose a block". On the right sidebar, the "Categories" section is expanded, showing a list of categories: "Student Work" (checked), "Discussions", "Final Portfolio Work", "Final Reflection Work", "Introductory Work" (checked), and "Unit 1 Work". Below the categories is a "Tags" section with an "Add New Tag" input field. The top navigation bar includes "My OpenLab", "ENG1121 English Composition 2", and a user profile for "Hi, Jessica Penner" with a "Log Out" button. The bottom of the screen shows a Windows taskbar with various application icons and a system clock showing 2:21 PM on 8/25/2020.

Next, write your post with your name in the title. Be sure to add the tag "Introductions." Hit "publish"! (And keep it public, so your classmates can see it!)

This screenshot shows the same WordPress admin interface as the previous one, but with more content. The title field now contains "Full Name" and the main content area has the placeholder text "What I wonder about...". In the "Tags" section of the right sidebar, the word "Introductions" has been entered into the "Add New Tag" input field. The "Categories" section remains the same, with "Student Work" and "Introductory Work" selected. The top navigation bar and the Windows taskbar at the bottom are also visible, showing the same user profile and system clock.
