Prolog answers queries using the facts and rules it is given. For example, using the facts and rules listed, the query

?enrolled(kevin,math273)

produces the response

ves

because the fact *enrolled*(kevin, math273) was provided as input. The query

?enrolled(X,math273)

produces the response

kevin kiko

To produce this response, Prolog determines all possible values of X for which enrolled(X, math273) has been included as a Prolog fact. Similarly, to find all the professors who are instructors in classes being taken by Juana, we use the query

?teaches(X,juana)

This query returns

patel grossman

Exercises

- **1.** Let P(x) denote the statement " $x \le 4$." What are these truth values?
 - **a**) P(0)
- **b**) *P*(4)
- **c**) *P*(6)
- **2.** Let *P*(*x*) be the statement "The word *x* contains the letter *a*." What are these truth values?
 - a) P(orange)
- **b)** P(lemon)
- \mathbf{c}) P(true)
- \mathbf{d}) P(false)
- **3.** Let *Q*(*x*, *y*) denote the statement "*x* is the capital of *y*." What are these truth values?
 - a) O(Denver, Colorado)
 - **b**) Q(Detroit, Michigan)
 - c) Q(Massachusetts, Boston)
 - **d**) Q(New York, New York)
- **4.** State the value of x after the statement **if** P(x) **then** x := 1 is executed, where P(x) is the statement "x > 1," if the value of x when this statement is reached is
 - **a**) x = 0.
- **b**) x = 1.
- **c**) x = 2.
- **5.** Let P(x) be the statement "x spends more than five hours every weekday in class," where the domain for x consists of all students. Express each of these quantifications in English.

- **a**) $\exists x P(x)$
- **b**) $\forall x P(x)$
- c) $\exists x \neg P(x)$
- **d**) $\forall x \neg P(x)$
- **6.** Let *N*(*x*) be the statement "*x* has visited North Dakota," where the domain consists of the students in your school. Express each of these quantifications in English.
 - a) $\exists x N(x)$
- **b**) $\forall x N(x)$
- c) $\neg \exists x N(x)$

- **d**) $\exists x \neg N(x)$
- e) $\neg \forall x N(x)$
- **f**) $\forall x \neg N(x)$
- 7. Translate these statements into English, where *C*(*x*) is "*x* is a comedian" and *F*(*x*) is "*x* is funny" and the domain consists of all people.
 - a) $\forall x (C(x) \rightarrow F(x))$
- **b**) $\forall x (C(x) \land F(x))$
- c) $\exists x (C(x) \rightarrow F(x))$
- **d**) $\exists x (C(x) \land F(x))$
- **8.** Translate these statements into English, where *R*(*x*) is "*x* is a rabbit" and *H*(*x*) is "*x* hops" and the domain consists of all animals.
 - **a**) $\forall x (R(x) \to H(x))$
- **b**) $\forall x (R(x) \land H(x))$
- c) $\exists x (R(x) \rightarrow H(x))$
- **d**) $\exists x (R(x) \land H(x))$
- 9. Let P(x) be the statement "x can speak Russian" and let Q(x) be the statement "x knows the computer language C++." Express each of these sentences in terms of P(x), Q(x), quantifiers, and logical connectives. The domain for quantifiers consists of all students at your school.

- a) There is a student at your school who can speak Russian and who knows C++.
- b) There is a student at your school who can speak Russian but who doesn't know C++.
- c) Every student at your school either can speak Russian or knows C++.
- d) No student at your school can speak Russian or knows C++.
- **10.** Let C(x) be the statement "x has a cat," let D(x) be the statement "x has a dog," and let F(x) be the statement "xhas a ferret." Express each of these statements in terms of C(x), D(x), F(x), quantifiers, and logical connectives. Let the domain consist of all students in your class.
 - a) A student in your class has a cat, a dog, and a ferret.
 - **b)** All students in your class have a cat, a dog, or a ferret.
 - c) Some student in your class has a cat and a ferret, but not a dog.
 - d) No student in your class has a cat, a dog, and a ferret.
 - e) For each of the three animals, cats, dogs, and ferrets, there is a student in your class who has this animal as a pet.
- 11. Let P(x) be the statement " $x = x^2$." If the domain consists of the integers, what are these truth values?
 - **a)** P(0)
- **b**) *P*(1)
- c) P(2)

- **d**) P(-1)
- e) $\exists x P(x)$
- **f**) $\forall x P(x)$
- **12.** Let Q(x) be the statement "x + 1 > 2x." If the domain consists of all integers, what are these truth values?
 - **a)** O(0)
- **b**) Q(-1)

- **d**) $\exists x O(x)$
- e) $\forall x O(x)$
- f) $\exists x \neg O(x)$

- **g**) $\forall x \neg O(x)$
- 13. Determine the truth value of each of these statements if the domain consists of all integers.
 - a) $\forall n(n+1>n)$
- **b**) $\exists n(2n = 3n)$
- c) $\exists n(n=-n)$
- **d**) $\forall n(3n \leq 4n)$
- 14. Determine the truth value of each of these statements if the domain consists of all real numbers.
 - **a**) $\exists x(x^3 = -1)$
- **b**) $\exists x(x^4 < x^2)$
- **c**) $\forall x((-x)^2 = x^2)$
- **d**) $\forall x(2x > x)$
- 15. Determine the truth value of each of these statements if the domain for all variables consists of all integers.
 - a) $\forall n(n^2 \ge 0)$
- **b**) $\exists n(n^2 = 2)$
- c) $\forall n(n^2 \ge n)$
- **d**) $\exists n(n^2 < 0)$
- **16.** Determine the truth value of each of these statements if the domain of each variable consists of all real numbers.
 - **a)** $\exists x(x^2 = 2)$
- **b**) $\exists x(x^2 = -1)$
- c) $\forall x(x^2 + 2 \ge 1)$
- **d**) $\forall x(x^2 \neq x)$
- 17. Suppose that the domain of the propositional function P(x) consists of the integers 0, 1, 2, 3, and 4. Write out each of these propositions using disjunctions, conjunctions, and negations.
 - a) $\exists x P(x)$
- **b**) $\forall x P(x)$
- c) $\exists x \neg P(x)$

- **d**) $\forall x \neg P(x)$
- e) $\neg \exists x P(x)$
- **f**) $\neg \forall x P(x)$

- 18. Suppose that the domain of the propositional function P(x) consists of the integers -2, -1, 0, 1, and 2. Write out each of these propositions using disjunctions, conjunctions, and negations.
 - a) $\exists x P(x)$
- **b**) $\forall x P(x)$
- c) $\exists x \neg P(x)$

- **d**) $\forall x \neg P(x)$
- e) $\neg \exists x P(x)$
- \mathbf{f}) $\neg \forall x P(x)$
- 19. Suppose that the domain of the propositional function P(x) consists of the integers 1, 2, 3, 4, and 5. Express these statements without using quantifiers, instead using only negations, disjunctions, and conjunctions.
 - a) $\exists x P(x)$
- **b**) $\forall x P(x)$
- c) $\neg \exists x P(x)$
- **d**) $\neg \forall x P(x)$
- e) $\forall x((x \neq 3) \rightarrow P(x)) \lor \exists x \neg P(x)$
- 20. Suppose that the domain of the propositional function P(x) consists of -5, -3, -1, 1, 3, and 5. Express these statements without using quantifiers, instead using only negations, disjunctions, and conjunctions.
 - a) $\exists x P(x)$
- **b**) $\forall x P(x)$
- c) $\forall x((x \neq 1) \rightarrow P(x))$
- **d**) $\exists x((x \ge 0) \land P(x))$
- e) $\exists x (\neg P(x)) \land \forall x ((x < 0) \rightarrow P(x))$
- 21. For each of these statements find a domain for which the statement is true and a domain for which the statement is false
 - a) Everyone is studying discrete mathematics.
 - **b)** Everyone is older than 21 years.
 - Every two people have the same mother.
 - **d)** No two different people have the same grandmother.
- 22. For each of these statements find a domain for which the statement is true and a domain for which the statement is false.
 - a) Everyone speaks Hindi.
 - **b)** There is someone older than 21 years.
 - c) Every two people have the same first name.
 - d) Someone knows more than two other people.
- 23. Translate in two ways each of these statements into logical expressions using predicates, quantifiers, and logical connectives. First, let the domain consist of the students in your class and second, let it consist of all people.
 - a) Someone in your class can speak Hindi.
 - **b)** Everyone in your class is friendly.
 - c) There is a person in your class who was not born in California.
 - **d)** A student in your class has been in a movie.
 - e) No student in your class has taken a course in logic programming.
- 24. Translate in two ways each of these statements into logical expressions using predicates, quantifiers, and logical connectives. First, let the domain consist of the students in your class and second, let it consist of all people.
 - a) Everyone in your class has a cellular phone.
 - Somebody in your class has seen a foreign movie.
 - There is a person in your class who cannot swim.
 - d) All students in your class can solve quadratic equa-
 - e) Some student in your class does not want to be rich.
- 25. Translate each of these statements into logical expressions using predicates, quantifiers, and logical connectives.

- a) No one is perfect.
- **b)** Not everyone is perfect.
- c) All your friends are perfect.
- d) At least one of your friends is perfect.
- e) Everyone is your friend and is perfect.
- f) Not everybody is your friend or someone is not perfect.
- **26.** Translate each of these statements into logical expressions in three different ways by varying the domain and by using predicates with one and with two variables.
 - a) Someone in your school has visited Uzbekistan.
 - b) Everyone in your class has studied calculus and C++.
 - c) No one in your school owns both a bicycle and a motorcycle.
 - **d**) There is a person in your school who is not happy.
 - e) Everyone in your school was born in the twentieth century.
- **27.** Translate each of these statements into logical expressions in three different ways by varying the domain and by using predicates with one and with two variables.
 - a) A student in your school has lived in Vietnam.
 - b) There is a student in your school who cannot speak Hindi.
 - c) A student in your school knows Java, Prolog, and C++.
 - d) Everyone in your class enjoys Thai food.
 - e) Someone in your class does not play hockey.
- **28.** Translate each of these statements into logical expressions using predicates, quantifiers, and logical connectives.
 - a) Something is not in the correct place.
 - b) All tools are in the correct place and are in excellent condition.
 - c) Everything is in the correct place and in excellent condition.
 - d) Nothing is in the correct place and is in excellent condition.
 - e) One of your tools is not in the correct place, but it is in excellent condition.
- **29.** Express each of these statements using logical operators, predicates, and quantifiers.
 - a) Some propositions are tautologies.
 - **b)** The negation of a contradiction is a tautology.
 - c) The disjunction of two contingencies can be a tautology.
 - **d**) The conjunction of two tautologies is a tautology.
- **30.** Suppose the domain of the propositional function P(x, y) consists of pairs x and y, where x is 1, 2, or 3 and y is 1, 2, or 3. Write out these propositions using disjunctions and conjunctions.

- a) $\exists x P(x, 3)$
- **b**) $\forall v P(1, v)$
- c) $\exists y \neg P(2, y)$
- **d**) $\forall x \neg P(x, 2)$
- **31.** Suppose that the domain of Q(x, y, z) consists of triples x, y, z, where x = 0, 1, or 2, y = 0 or 1, and z = 0 or 1. Write out these propositions using disjunctions and conjunctions.
 - **a**) $\forall y Q(0, y, 0)$
- **b**) $\exists x Q(x, 1, 1)$
- c) $\exists z \neg Q(0, 0, z)$
- **d**) $\exists x \neg Q(x, 0, 1)$
- **32.** Express each of these statements using quantifiers. Then form the negation of the statement so that no negation is to the left of a quantifier. Next, express the negation in simple English. (Do not simply use the phrase "It is not the case that.")
 - a) All dogs have fleas.
 - **b)** There is a horse that can add.
 - c) Every koala can climb.
 - d) No monkey can speak French.
 - e) There exists a pig that can swim and catch fish.
- **33.** Express each of these statements using quantifiers. Then form the negation of the statement, so that no negation is to the left of a quantifier. Next, express the negation in simple English. (Do not simply use the phrase "It is not the case that.")
 - a) Some old dogs can learn new tricks.
 - b) No rabbit knows calculus.
 - c) Every bird can fly.
 - d) There is no dog that can talk.
 - e) There is no one in this class who knows French and Russian.
- **34.** Express the negation of these propositions using quantifiers, and then express the negation in English.
 - a) Some drivers do not obey the speed limit.
 - **b)** All Swedish movies are serious.
 - c) No one can keep a secret.
 - d) There is someone in this class who does not have a good attitude.
- **35.** Express the negation of each of these statements in terms of quantifiers without using the negation symbol.
 - a) $\forall x(x > 1)$
 - **b**) $\forall x(x < 2)$
 - c) $\exists x (x \ge 4)$
 - **d**) $\exists x(x < 0)$
 - e) $\forall x((x < -1) \lor (x > 2))$
 - **f**) $\exists x ((x < 4) \lor (x > 7))$
- **36.** Express the negation of each of these statements in terms of quantifiers without using the negation symbol.
 - $\mathbf{a)} \ \forall x(-2 < x < 3)$
 - **b**) $\forall x (0 \le x < 5)$
 - c) $\exists x(-4 \le x \le 1)$
 - **d**) $\exists x(-5 < x < -1)$
- **37.** Find a counterexample, if possible, to these universally quantified statements, where the domain for all variables consists of all integers.
 - a) $\forall x(x^2 \ge x)$
 - **b**) $\forall x (x > 0 \lor x < 0)$
 - c) $\forall x(x=1)$
